The awareness program on the effects of globalization on the environment was held at SGK Government Degree College, Vinukonda, on the 30th of November 2023. The program was organized by the Eco Club in collaboration with the Department of Botany. The Local to Global Project, an NGO, facilitated the event.

Representatives from the Local to Global Project conducted informative sessions on the various ways in which globalization affects the environment. They highlighted issues such as climate change, biodiversity loss, and pollution, emphasizing the need for sustainable practices to mitigate these effects.

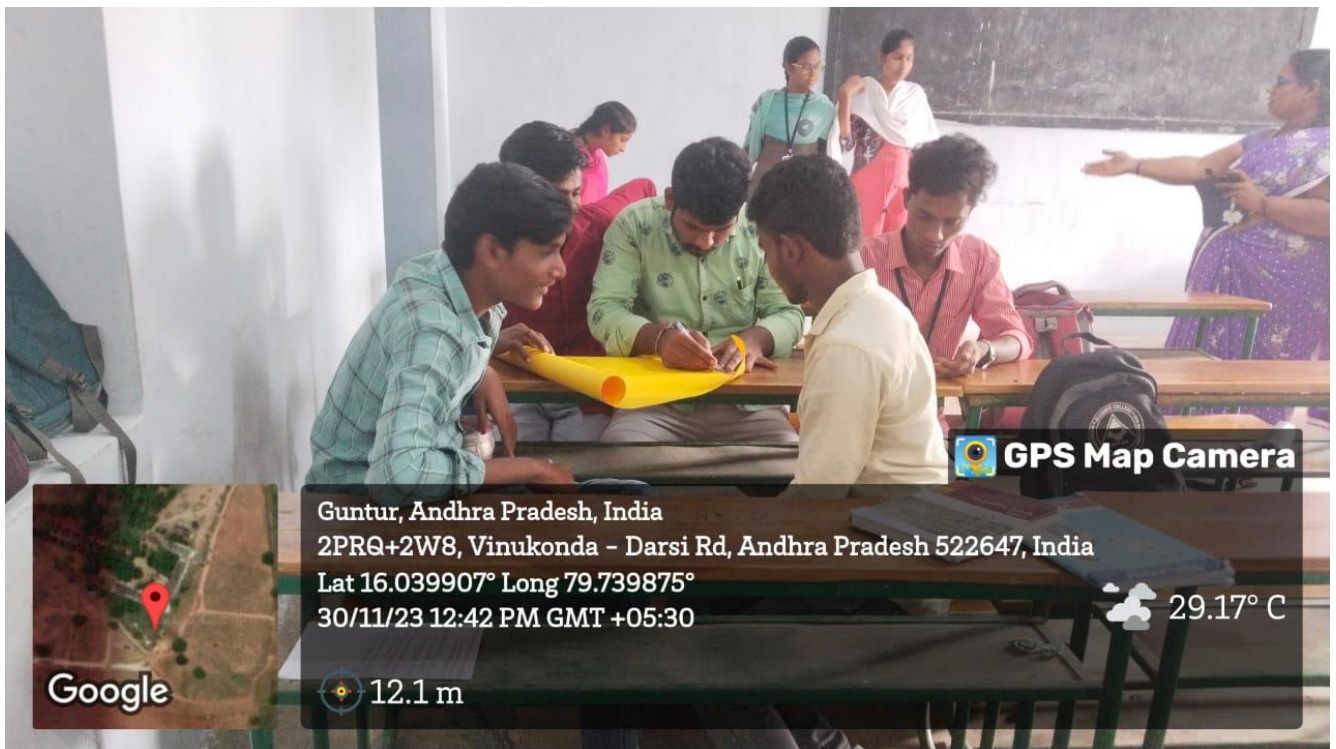

As part of the event, a painting competition was organized to encourage creative expression and engage students in reflecting on environmental themes. Participants were tasked with creating artworks that depicted the impact of globalization on the environment or advocated for eco-friendly practices.

Following the painting competition, prizes were awarded to the winners as recognition for their creativity and commitment to environmental awareness. This served to incentivize active participation and foster a sense of achievement among the students.

The awareness program on globalization's impact on the environment proved to be a meaningful and engaging event for the students of SGK Government Degree College, Vinukonda. Through informative sessions and creative activities, participants gained valuable insights into the importance of environmental conservation in the face of global challenges. The success of the program underscores the significance of collaborative efforts in promoting environmental awareness and fostering a culture of sustainability within educational institutions.
